Message from Attorney General Eric Schmitt

As the Attorney General for the state of Missouri, my job is to protect each and every one of our six million citizens from crime, abuse and fraud, no matter their race, creed, zip code or religion. I take this responsibility very seriously. Our government, the shared responsibility between the citizens of our state and the elected officials, must provide all citizens the opportunity to pursue happiness and success.

The office of the Missouri Attorney General is required, by law, to collect data on the demographics and dynamics of traffic stops made by law enforcement officers across the state, and report these findings to the Governor and the public. Importantly, this data can help law enforcement identify disparities in stops, searches, and arrests and take appropriate action to improve both public safety and community relations.

This year's report features analysis of a new question on whether the driver of a vehicle resides in the jurisdiction of the law enforcement agency conducting the traffic stop. This question provides readers a better picture of traffic stop disparities by improving the population that traffic stops are compared against and is a step forward for the report. In addition, as our office worked on this year's report and consulted stakeholders across the state, we identified further improvements that will make the report even more insightful. This will include, but not be limited to, modernizing the data collection infrastructure to allow deeper analysis of the data and adjusting the questions on the form to gather additional context surrounding traffic enforcement.

As we seek to balance the rights of all citizens of our state with the enforcement of the rule of law, and the brave men and women of law enforcement who put their lives on the line every day to protect us, we will continue to improve this report so it can better inform future public policy debates.

Eric Schmitt
Attorney General

Background

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of bias in traffic enforcement prompted the passage of SB 1053 (2000). SB 1053 created Section 590.650, RSMo. which became effective August 28, 2000. This statute created the Vehicle Stops Report and required that the Attorney General's Office collect and report on traffic stops conducted by law enforcement officers across the state of Missouri.

Under § 590.650, RSMo. all peace officers in the state must report specific information, including a driver's race, for each vehicle stop made in the state. Law enforcement agencies must provide their vehicle stops data to the Attorney General by March 1, and the Attorney General must compile the data and report to the Governor, General Assembly, and each law enforcement agency no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not submit its vehicle stops data to the Attorney General by the statutory deadline.

The summary of statewide vehicle stops data has been provided by Dr. Scott H. Decker, professor in the School of Criminology and Criminal Justice at Arizona State University; Dr. Richard Rosenfeld, Professor Emeritus in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Dr. Jeff Rojek, associate professor in the School of Criminal Justice and Director of the Center for Anti-Counterfeiting and Product Protection at Michigan State University.

Statewide Metrics

This report summarizes the data from 596 law enforcement agencies in Missouri for calendar year 2018. An additional 66 agencies indicated they made no traffic stops during the year. These agencies often contract out traffic enforcement to another agency covering their jurisdiction and focus on other enforcement activities. In total, this report represents 97.6% of the 678 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,539,477 vehicle stops, resulting in 101,671 searches and 72,017 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group. Four summary metrics are included in Table 1 that may be useful in assessing bias in traffic enforcement.

When assessing these four metrics and the auxiliary statistics alongside them, the concept of discretion is an important consideration. For bias to influence the decisions of law enforcement officers, they must have some discretion in the action they take. If officers have many possible actions to take in a given situation, then it is possible for bias to affect their decision-making process. However, if officers only have one course of action in a given situation, there is little room for bias to influence their decisions without breaking from procedure or statute, so caution should be used in attributing bias.

An example of this is when a driver that has been stopped has an outstanding warrant for his or her arrest. In this situation, an officer must arrest and then search that driver. If outstanding warrants become concentrated in a racial/ethnic group in an agency's jurisdiction, this may result in the appearance of a disparity in arrest rates when officers had no discretion in their actions and therefore could not have been influenced by bias. Analysis of the degree of discretion that officers have in various situations is vital for a complete understanding of this report.

2018 Statewide Summary of Results

Key indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,730,501	3,914,998	515,828	139,109	80,677	19,168	60,721
Statewide Population %	100.00%	82.76	10.90	2.94	1.71	0.41	1.28
Stops	1,539,477	1,177,844	296,065	34,769	14,849	2,016	13,934
Disparity Index	---	.92	1.76	.77	.56	.32	.71
Searches	101,671	71,168	26,448	2,933	431	120	571
Search Rate	6.60	6.04	8.93	8.44	2.90	5.95	4.10
Contraband Hit Rate	34.96	35.68	33.82	29.15	29.00	35.00	31.70
Arrests	72,017	50,101	18,853	2,175	343	84	461
Arrest Rate	4.68	4.25	6.37	6.26	2.31	4.17	3.31

Notes: Population figures are 2010 Census data based on persons 16 and older who designated a single race. Hispanics may be of any race. "Other" includes persons of mixed race or unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation; values less than 1 indicate under-representation.

Search rate = (searches / stops) x 100.
Contraband hit rate = (searches with contraband found / total searches) x 100.
Arrest rate = (arrest / stops) x 100.

Disparity Index

The first summary metric is the "disparity index" and it relates each racial/ethnic group's proportion of total traffic stops to its proportion of the driving-age (16+) population. A value of 1 indicates that a group's proportion of vehicle stops equals its population proportion: it is neither "under-represented" nor "over-represented." Values above 1 indicate over-representation, and those below 1 indicate under-representation in traffic stops.

For example, the 1,177,844 whites who were stopped accounted for 76.5% of all vehicle stops in 2018. Whites comprise an estimated 82.8% of Missouri's driving age population. Therefore, the value for whites on the disparity index is .92 (.765/.828). As this value is below 1, whites were stopped at slightly below the rate expected based on their portion of the population age 16 and older from the 2010 Census.

The same is not the case for several other groups. Blacks represent 10.9% of Missouri's driving-age population but 19.2% of all vehicle stops, for a disparity index of 1.76. This means that Blacks were stopped at a rate 76% greater than expected based upon their portion of the population sixteen and older.

Hispanics (0.77), Asians (0.56), American Indians (0.32), and persons of mixed or unknown race (0.71) were stopped at rates well below an expectation based upon their portion of the driving-age population.

The values on the disparity index for the different groups can be compared directly to one another by dividing their values. For example, the likelihood that a black motorist was stopped is 1.91 times that of a white motorist (1.76/.92). In other words, blacks were 91% more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in the 2010 Census.

Limitations

The disparity index relies upon a benchmark to set the expected rate at which members of a racial/ethnic group should be stopped. The actual rate of stops is then compared against this benchmark to calculate the disparity index. The 2018 Vehicle Stops Report uses the racial/ethnic portions of the driving-age (16+) 2010 Census populations of each jurisdiction for its benchmarks. This is an imperfect benchmark as a person does not need to live in an area to drive through it and a person may not drive despite being old enough to legally do so. This dynamic can lead to the racial/ethnic makeup of drivers on a jurisdiction's roadways differing from that of its residential population. The extremely low disparity index value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, the benchmark population figures are eight years older than the vehicle stops data they are compared to. The age of these estimates may lead to some jurisdictions' population estimates differing significantly from their current values.

Appendices to this report can provide useful analysis to partially alleviate these issues. Appendix A uses statewide rather than local racial/ethnic population portions to generate disparity index calculations, reducing the impact of the residency issue. Appendix C makes use of the residency question added to the Vehicle Stops Report form for the 2018 reporting cycle to only use traffic stops of residents of an agency's jurisdiction when generating the disparity index. This allows an analyst to control for driver residency when examining an agency's report.

Search Rate

A second metric that can be used to assess bias in traffic enforcement is the "search rate," or the number of searches divided by the number of stops (x 100). Searches include both searches of drivers and searches of the vehicle and property within.

The search rate for all motorists who were stopped in 2018 was 6.60%. Asians were searched at a rate well below the statewide average (2.90%), while Blacks (8.93%) and Hispanics (8.44%) were searched at rates above the average for all motorists who were stopped. Whites were searched at a rate below the state average at 6.04%. The search rate for racial/ethnic groups can also be directly compared with one another. Blacks were 1.48 times more likely to be searched than whites (8.93/6.04). Hispanics were 1.40 times more likely than whites to be searched (8.44/6.04).

Limitations

The reasons for conducting a search and the outcome of the search (i.e. discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest—this means that there is no other reason given for the search other than arrest. As mentioned above, searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

It is notable that the search rate, along with the other post-stop metrics, are not subject to the benchmarking issues that affect the stop disparity index. The benchmarks for the post-stop metrics are the number of stops reported, so no estimation is involved in their calculation, making them more reliable metrics for assessing possible bias.

Contraband Hit Rate

The third summary metric, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 35.0% of all searches conducted in 2018. There is some variation, however, in the contraband hit rate across racial/ethnic groups.

The contraband hit rate for whites was 35.7%, compared with 33.8% for Blacks and 29.2% for Hispanics. This means that, on average, searches of Blacks and Hispanics are less likely than searches of whites to result in the discovery of contraband.

Limitations

While the contraband hit rate is not subject to benchmark issues, the degree of discretion officers have in their searches should still be considered when examining contraband hit rates. The difference in contraband hit rates among racial/ethnic groups may result in part from the higher arrest rates for Blacks and Hispanics—if there is an arrest, there will be a search whether or not the arresting officer suspects the subject has contraband. This may deflate the contraband hit rate since searches are being completed based on procedure rather than suspicion of contraband.

Arrest Rate

The "arrest rate" is the fourth summary metric included in Table 1 that may be useful for assessing bias in traffic enforcement. Statewide, 4.68% of all traffic stops resulted in an arrest (72,017/1,539,477). The probability of arrest varies across racial and ethnic groups.

Approximately 6.37% of the stops of Blacks and 6.26% of the stops of Hispanics resulted in arrest, compared with about 4.25% of the stops of whites. Asians (2.31%), American Indians (4.17%), and people of mixed or unknown race (3.31%) had lower arrest rates than whites. The dynamic of Blacks and Hispanics being arrested at a higher rate than whites likely affects the discrepancies in search and contraband hit rates as described above

Limitations

Like the other post-stop metrics, the arrest rate does not suffer from benchmark issues, however, officer discretion should still be considered as described above.

Conclusion

Missouri is a vast and complex state at the crossroads of the country. Each of its communities is unique and presents many dynamics that must be comprehensively evaluated when assessing the possibility of bias in traffic enforcement. Each agency's report should be read in conjunction with its entries in each of the appendices and in the context of the dynamics of the community it serves. This report is subject to limitations as described above and simply aims to provide a starting point for local dialogue.

Appendices

Section 590.650, Revised Statutes of Missouri, State Law on Vehicle Stops

Appendix A: Local Vehicle Stops in Proportion to State Racial Composition

Appendix A presents the traffic stop analysis using the statewide proportions of race and ethnicity, rather than the local proportions of each jurisdiction. This is valuable as it reduces the impact of the residency benchmark issue on the disparity index of each agency.

Appendix B: Disparity Indexes for 2000-2018 Compared

Appendix B compares the 2018 disparity index to the disparity indexes for 2000 through 2017. For each agency, the disparity index for each race-ethnic group is presented for 2000-2018. For the state as a whole, the key metrics generally show small changes between 2016 and 2018.

Appendix C: Resident and Non-Resident Stops

In 2018, for the first time, Appendix C displays the number and percentage of traffic stops of residents of the jurisdiction where the stop occurred separately from the total number of stops (i.e., stops of residents + stops of nonresidents). Disparity Indexes for the different population groups are also shown.

Appendix C uses the addition of the driver residency question for the 2018 reporting cycle to provide a disparity index calculated using only traffic stops of drivers who reside in the agency's jurisdiction. This is the first time this analysis has been possible since the Vehicle Stops Report was created in 2000.

Table 2. Agencies that did not submit reports by March 1, 2019 as required by state law

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Ashland is a municipality with a current, estimate, population of 5,000. The web site DATAUSA lists our citizen diversity at 95.2% white, 0.44% black (which correlates to 17 black residents) and the remaining percentage Hispanic, Asian or other. The Attorney General form provided with the analysis, lists the white population of Ashland as 96.41% and the black population at 0/66& (18 black residents). Ashland is located mid-way between Columbia and Jefferson City, with U.S. Highway 63 running through our town. This major roadway brings a large number of drivers from outside our jurisdiction passing through on a regular basis. Secondly, the 2018 results were calculated with 9 year old census data including the number of drivers who are 16 years of age and older. The last census tallied Ashland at 3,700. It has now grown approximately 26%. Drivers of various races pass through Ashland daily, on a highway that traverses the State north to south. Many of these drivers temporarily exit at Ashland for access to fuel, food, rest rooms and other commercial needs. Inevitably, the Ashland Police come into contact with a higher proportion of ethnicities than what populates our boarders, which skews the analysis results. Please consider these unique dynamics when reviewing Ashland's disparity index.

The city of Bella Villa is located in an area the is adjacent to Interstate 55 and Lemay Ferry. Our city is bordered by highly populated areas of unincorporated St. Louis County and the city of St. Louis. While the population of black persons in our city is only 1.66% - the county population is 24.7%, as of 2017. Our percentage of stops for black drivers was 25.0% in 2018. The county demographic is much closer to that percentage seeing that thousands of people drive through our city for access to work and access to the interstate each day.

The City of Blue Springs is located in The Kansas City Metropolitan area along Interstate 70 and US 40 Highways. This route is heavily traveled between Kansas City and St. Louis with both in State and out of State travelers. Within the City, and in close proximity to the Interstate 70 corridor, are many restaurants and retail businesses to include a large shopping complex at Interstate 70 and Adams Dairy Parkway. In addition, the Blue Springs School District attracts a large number of students and visitors who are not actual residents of the City. These daily travelers greatly affect the population levels outside of those reflected in the State population estimates of drivers 16 and over, which in turn has an impact on the disparity index. The City of Blue Springs has made a strong commitment to protect citizens, both residents and non-residents, from racial or bias based profiling. In addition to the mandatory annual Racial Profiling training required by the State of Missouri, the members of the Blue Springs Police Department, both sworn and civilian, have been given additional POST certified training in this area. In 2017 Henry Lyons of the Olathe, Ks. NAACP conducted Bias Free Policing for all sworn officers and some civilian staff. The Blue Springs Police Department brings in a guest instructor of this nature annually, and in 2018 Jan Mirikitani of Mirikitani and Associates was our guest instructor. The Police Department also invites members of the Human Relations Commission to attend those trainings with officers and staff.

Boone County's population is growing rapidly, experiencing an increase of over 9% since the 2010 census. U.S. Census Bureau data as of July 2017 (2018 data not available), estimates Boone County's population at 178,271. Boone is one of the fastest growing counties, and Columbia is now the 4th largest city in Missouri. The City of Columbia is the metropolitan center of Boone County and is the home to the state's flagship university, two other smaller colleges and many satellite college campuses. Columbia is the regional hub for employment in the education, medical (5 hospitals), insurance and manufacturing industries. Columbia also hosts multiple shopping, sporting and entertainment venues which draw visitors from all over the country. Boone County has the convergence of two major highways (Interstate 70 and U.S. Highway 63), and its population is greater during the day than at any other time with commuting workers.

The City of Branson is uniquely different than most US cities in that we have a relatively small permanent population but annually we welcome some 8.5 million visitors into our entertainment districts. These visitors are generally present between March and Mid-December and may directly impact the overall results of our annual report.

Here in the city of Brentwood we have several very large and very busy retail areas. The Target at the Promenade, in fact, is the highest grossing Target store in the nation. In terms of revenue, over $660,000,000 annually is generated from sales tax in Brentwood. Although our residential population is only around 8,000 our retail area draws patrons from all over the St. Louis region. This influx attributes to a dramatic increase in non-local traffic we see on a daily basis.

VEHICLE STOPS DATA 2018

The City of Bridgeton is located near Lambert Airport and consists of a small residential population. There are three major interstate highways; namely, 70, 270 and 370 that run through the City. Also, US highway 67 (Lindbergh), St. Charles Rock Road and Natural Bridge Road are major thoroughfares which also run through the City of Bridgeton. There is a large transient population and work force with many hotels and large industrial employers within Bridgeton's boundaries.

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Cape Girardeau County has an interstate highway (I-55) that goes through it resulting in a large number of drivers from other jurisdictions passing through our county. There is also a large diverse university (Southeast Missouri State University) in our county that has students from other jurisdictions.

VEHICLE STOPS DATA 2018

The traffic stop data for the Carl Junction Police Department shows a disparity rate under the "Black" heading of 5.43. I believe this is a misleading number and the reasons behind this are multiple. The City of Carl Junction has grown greatly since the last census in 2010 and I don't believe that the .80 that has been listed in the "Black" population column is valid in our community. The second part of this is that the majority of these stops were made on MO. State Highway 171. Highway 171 is the major thoroughfare between Southeast Kansas and Southwest Missouri. There are also two State Universities in the area with travel between these schools made daily and the largest percentage of the stops are in the college age group. I believe the traffic travelling through town population is probably more in line with the State population, along with matching the cultural differences in your headings. I believe there is an assumption that the officers know the race of the driver of the vehicle before it is stopped in your data collection. The truth is there is an average 13.5 hours of daylight during the year, it is very difficult, if not impossible to tell the race of drivers during night time hours, and it is my observation that it is not always possible to determine the race of a driver before a traffic stop during daylight hours. There is a 'time of stop" space on the traffic stop data sheet, but it is not asked for on the report. I would ask that time of stop be included on the data collection.

The Chesterfield Police Department strictly prohibits any and all forms of biased policing (racial profiling) by its personnel. This prohibition of bias policing practices applies to all encounters between police officers and citizens including arrests, traffic contracts, suspicious vehicle stops, field contracts, investigative detentions, consensual inquiries and forfeiture efforts. In addition to providing “Traffic Analysis” data to the Missouri Attorney General’s Office annually, meeting all state statute requirements, the department has implemented a number of safeguards in order to prevent and or detect any possible signs of biased policing. The department utilizes monthly Quality Service Evaluations (QSE); randomly choosing sixty individuals who had contact with the agency’s personnel each month and mailing them survey forms regarding the quality of services received. A more extensive citizen survey is mailed to every household in Chesterfield once every three years seeking similar input. The results of these surveys are closely scrutinized for possible indicators of biased policing practices. Annual training on biased based policing is provided to all commissioned personnel and a Citizens’ Concerns memo is compiled quarterly and reviewed by command personnel for possible evidence of biased police practices. Another means of preventing and monitoring for biased policing practices is through the department’s weekly in-car camera audits which are conducted by all supervisors in the Patrol, Traffic & Special Enforcement Units. Each officer in these units has a standard number of their vehicle stops randomly chosen and reviewed by their supervisors each month. The results of these audits are forward to the division commander for review. A similar audit of newly issued Body Warn Cameras is also in place. In addition to heading off possible racial profiling practices, these audits often lead to the discovery of equipment failures or potentially unsafe actions by officers and repairs or spot corrections can then be made. The approximate population of the City of Chesterfield (according to recent census data) is 47, 717. According to the 2017 Missouri Attorney General’s Vehicle Stop data, Chesterfield officers stopped 13,278 vehicles; 76% of the drivers were White, 15.8% were Black, 3.2% were Asian; less than 1% were Hispanic. For comparison purposes, the City’s population demographics are estimated to be 84% White, 3.5% Black, 9.8% Asian and 2.8% Hispanic. It should be noted that this data regarding the percentage of African-Americans living in Chesterfield may be somewhat deceiving as the day-time population of Chesterfield, in both numbers and racial/ethnic makeup, is considerably different than those portrayed in the latest Census figures. Because Chesterfield is home to four major retails centers, numerous restaurants and a large light-industrial center, the numbers of African-Americans working, shopping and otherwise doing business within

business within the city limits is likely much higher than is represented in the City's population. Additionally, Chesterfield has an interstate (I-64) and several large state and county roadways that intersect it and although the racial make-up of those traveling on these roadways is unknown, it is very unlikely that it would closely mirror the racial and ethnic makeup of the city's population. The Chesterfield Police Department is committed to investigating all complaints of biased policing and conducts an annual administrative review. There were no complaints of biased policing received in 2018.

It should be noted that Clayton is unlike most cities in St. Louis County. As the county seat, it is home to the County's Courts, Government Center, the Justice Center and many other social services. Clayton is also home to major corporations and a destination for restaurant and retail businesses. As such, Clayton serves as a hub of economic and governmental activity for the entire region. Clayton welcomes diverse visitors to the community on a daily basis. While this analysis is based on a residential population of 15,939 people (2010 census), Clayton is said to have a daily average population of roughly 46,000 people, which rises to an estimated peak of 70,000-80,000 people. Additionally, using figures from a study for our Downtown Housing Project, Clayton has an estimated population of 17,593 people living within a one-mile radius of City Hall. These numbers increase to 113,679 from 0-3 miles out, and to 297,877 from 0-5 miles out. Using these figures, the minority population is calculated at 9.93%, 29.35%, and 33.85%, respectively. For this reason, using Clayton's residential population to determine potential bias doesn't appear to be an appropriate method, as it does not consider the people living, working, and visiting Clayton, either in total numbers or in racial makeup. In tandem with these figures, social scientists say there are other factors which should be considered in attempting to determine potential bias. Among these are driving quantity, quality and location, all of which are legitimate factors for reviewing car stop data.

Concordia is a unique community that sits along I70. We get many people that will stop in our community to pump gas, eat, or rest while they travel through. Many people who are stopped are from other jurisdictions due to people that are stopped while traveling through. Also we have several industrial plants (Such as Tyson's Retail Deli, Milbanks, and Old World Spices & Seasonings) that employa large number of minorities and individuals who reside in other jurisdictions.

Our response to the 2018 Vehicle Stops Racial Profiling report is two-fold. First, the Attorney General's office is utilizing population data that is now nine (9) years old, which is likely inaccurate. Second, to determine the disparity index your office has historically used local population numbers (which again is currently aged data). For our department in 2018, less than half of our stops of black drivers (73 to be exact) were residents of our jurisdiction. This means that more than 53% of those stops involved a driver not represented in our local population percentage of black drivers age 16 and over. The motoring public numbers in our community are more accurately reflected in the statewide population rate, NOT the local population rate. Our city's variance of local population compared to the state population is relatively large, and in our case, this has a negative reflection on our report. The reported disparity index, in my opinion, is both highly inaccurate and grossly misleading based on our relatively low number of stops of black drivers, and the fact that the population of people traveling within our city has no direct correlation to our local population rate. We are a tourism town with breweries, wineries, wedding venues and most notably, the Elms Resort and Spa, all of which obviously welcome travelers and visitors of all races from areas well outside of our community. In addition, Excelsior Springs is home to a federal Job Corps education facility which proudly serves many inner city populations, and has the capacity to hold over 400 students, which in turn draws their families and friends to visit our community. To base your traffic stop analysis on a low local population rate, when the local rates vary significantly from the state population rates, is simply unjust, unreliable and unfairly paints a negative picture of an agency when it is not justified. To ensure a report is fair, the higher population rate of either the local or state population percentage for all races should be used for the disparity index, or even better, the data should be clearly separated for resident vs. non-resident stops. We have always collected this data point, even though the AG's office does not request or consider this data for its analysis.

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

The City of Gladstone is characterized as an “inner tier: suburb in the Greater Kansas City Metropolitan area north of the Missouri River. In fact, our city is completely surrounded by the City of Kansas City and law enforcement agencies in the region are impacted by the same challenges found in most major cities in the United States. An interstate highway (Interstate 29) passes through the southern section of our city and a major highway (U.S. 169 Highway) is situated a few hundred feet outside our west city limits. Both are major thorough fares in the area that bring a significant amount of vehicular traffic into and through Gladstone daily. There are several apartment complexes located within the city limits of Kansas City immediately adjacent to the City of Gladstone. Several of these apartment complexes are accessible only by way of Gladstone city streets, generating significant motor vehicle traffic-including minority drivers-through Gladstone who are not reflected in the recorded demographics for the City of Gladstone. IN addition, the City of Gladstone experiences considerable vehicular traffic that originates and/or terminates within Kansas City and/or the surrounding metropolitan area (both Missouri and Kansas). This is evidenced by an analysis of traffic accidents investigated by our agency. When examining accident statistics for the City of Gladstone for the calendar year 2018; the data reveals approximately 65% of the drivers involved in traffic accidents are non-residents of Gladstone. Gladstone residents account for 35% of the drivers involved in traffic accidents. The Annual Report to the Attorney General for 2018 submitted by Gladstone police officers were residents of Gladstone. The combination of freeway access, being surrounded by Kansas City, the concentrations of minority tenants in apartment complexes proximal to Gladstone, the visitor traffic generated by these apartments, and traffic generated from outside our city, attracts a higher percentage of motorists-including minorities- than the proportion of the minority residents of the city would suggest in the data recorded. The traffic accident data and the report to the Missouri Attorney General on traffic stops clearly supports the conclusion the vast majority of the vehicular traffic in Gladstone is non-residents of the city and therefore the conclusions drawn by analyzing traffic stops is flawed when comparing the data against the recorded minority population living in Gladstone. In light of recent events focused on law enforcement and disparate treatment of people of color in the United States, additional emphasis has been placed on educating our police officers. In addition to the annual online racial profiling training offered online through Police Legal Sciences (Biased-based Profiling/Racial Profiling/Fair & Impartial Policing) that meet the minimum requirements from Missouri Peace Officer Standards and Training (POST), all Gladstone officers were required to participate in “De-Escalation

Through Social Intelligence" in 2018. This training was presented by an instructor with the Kansas City Metropolitan Community Colleges. In May 2018, all sworn Gladstone police officers were required to attend an eight-hour training course entitled "Contemporary Law Enforcement Challenges" presented by Midwest Police Consultants, LLC. This course examined the concept of implicit bias and how the phenomenon can affect law enforcement. Gladstone officers are scheduled to attend this training again in May 2019. In addition, Gladstone officers are required to take online training courses from the city's liability insurance provider, Midwest Public Risk, on topics such as "Racial Profiling," "Racial Profiling in Missouri," and "Working with Minority Communities." Focused training on "bias awareness" for police officers is vitally important in creating an understanding of this subject and its impact on a community. Gladstone Department of Public Safety has established and vigorously enforces, policies to ensure minorities are not disproportionately subjected to stops or arrests by our police officers. These policies are reinforced by active/involved supervision and training of our law enforcement personnel to ensure racial profiling and other discriminatory behavior does not occur in the department. Thank you for allowing me to respond to the Attorney General's report to the Governor and the General Assembly.

Community dynamics such as a population disparity in Greene County Missouri between the 2010 and 2018 (current estimate) Census could skew data on vehicle stops. A second factor is that drivers may not live within Greene County, but are traveling through. With major highways 13, 65, 125, 60, 266, 413 and 360, as well as Interstate 44 within Greene County, there are thousands of transient drivers and occupants on our roads every day.

The City of Hannibal has both the US 61 and US 36 highways intersecting within its boundaries. In addition, Hannibal is known as “America’s Hometown” and for “Mark Twain” which draws a sizable number of tourists annually. Considering all these factors demonstrates Hannibal’s local population as related to race is an in accurate representation of what local law enforcement officers encounter in the performance of their duties. The statewide population % concerning race is a more accurate representation of the populace officers interact with during the completion of their duties.

In reviewing our department's traffic stop information that was previously submitted, it should be noted that we are nearby Ft. Leonard Wood Army base. We have a large number of people traveling through our community in route to the base. We are also approximately 16 miles south of the South Central Correction Center. This information provides our community with a far more diverse population than is reflected by our census.

I would like to advise you that I completely disagree with your findings with the Racial Profile results. What is not taken into consideration is the fact that Howard County has the Central Methodist University with a large number of students with different culture and racial differences than county population. Howard County is a pass through county that large numbers of people from the east and the north travel in order to get to the Casino Boat in Boonville. Before the Boar was put into Cooper County it was not uncommon to drive from the west side of the county across 40 Hwy to the east side late at night and never see a vehicle on the road. Now there is a constant flow of traffic across 40 Hwy. People now come from Macon, Randolph, Chariton, and other counties to the north traveling down Hwy 5 & 240 or Hwy 87 to get to the Casino Boat. These are two major factors that can easily distort the figures and results for traffic stops.

Independence is the fifth-largest city in Missouri, county seat and immediate suburb of Kansas City, with a population of 117,217. Ten major Interstates, highways and roadways allow direct access to the multiple racially diverse Kansas City metropolitan attractions located in the community; Harry S. Truman Presidential Library and historic home, Silverstein Eye Centers Arena , Super-Regional Independence Center Shopping Mall (2nd largest in KC Metro area with approximately 12 million annual visitors), 39th Street retail area, AMC 20 movie theater complex, Crysler Baseball Stadium, Community of Christ International Headquarters, colleges, community festivals, and multi-cultural dining venues. Significant traffic safety efforts are conducted along the major roadways and additional funding is provided for enforcement through state funded Hazardous Moving Violation grants, DWI Enforcement grants and Occupant Protection grants. 46% of the Department's total traffic stops in 2018 occurred during grant funded traffic safety enforcement. The City of Independence, 2018 disparity index has remained consistent with the past five years as the metropolitan attractions and thirty-one low income housing apartment complexes have influenced the racial composition of the motoring public to the community. The Independence Police Department is a professional law enforcement organization that is committed to impartial, competent, and courteous service to the public without regard to race, creed or gender. Officers receive annual training on cultural challenges and issues by ensuring and maintaining accountability in part through the integrity of the racial profiling documentation process in compliance with Missouri State Statute.

Some of the contributing factors for the index being over 1 are as follows: Jasper County has several miles of I-44, I-49, State Highway 96 and State Highway 43 running through it. We also have two major universities, MSSU and OCC, that are reported to bring in 20,000 licensed drivers from outside Jasper County per day. Jasper County also has several large corporations (Conway Trucking, Tri-State Trucking, Eagle Picher, Leggett and Platt among several other businesses that employ people who do not live in our jurisdiction or state. (We border Kansas and Oklahoma) We also have a large mall that is in Jasper County. A lot of people traveling through our county, working in our county or going to school in our county do not reside in Jasper County. Our population for Jasper County is approximately 117,728 residence but the Chamber of Commerce estimates that on any given day there are over 250,000 people in our county

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.1 million, which adds to the commuter population on the major thoroughfares. When examining search rates, the probable cause/authority to search reasons should be considered. And when examining arrest rates, the arrest charges should be considered. By design, the form on which the AG Office submitted the summary report did not include the category Stop Outcome "Other", which was a factor involving 2,945 stops. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University has 744 students listed other than white. They also have an additional 377 international students not included in the 744. ATSU enrollment for the fall of 2018 has 167 students listed as non-white and 29 unknown. The majority of ATSU students, 99%, come from outside the Kirksville area. The City of Kirksville has seen a significant increase of families from the Democratic Republic of the Congo since the 2010 census report. As an example, the Kirksville RIII School District reports 112 students enrolled in K-12 for the 2018-2019 school year. Kirksville is located on one of the few major north-south highways (Highway 63) that services northern Missouri and southern Iowa. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

The City of Ladue's African-American residential population is 0.88, which registers as one of the lowest African-American populations in the State of Missouri. Unfortunately, this is not a true reflection of the racial diversity represented in the City of Ladue on any given day. The transient or traveling population within Ladue is far different than the population of residents in Ladue. Ladue is home to several major thoroughfares, which are used to connect Ladue to people from all over St. Louis City, St. Louis County, and throughout Missouri. I-170 and US 64/40 both travel through Ladue, along with Clayton Road, Ladue Road, Warson Road, and McKnight Road which all carry high volumes of vehicles through Ladue on a daily basis. In addition, Lindbergh Boulevard is set just feet outside of Ladue's jurisdiction and provides access to the main thoroughfares of Ladue. Ladue is also home to several businesses to include high volume retail and grocery stores, multiple private and public schools, and a popular St. Louis County Park. Mention can also be made that two of St. Louis' shopping malls are placed on both the east and west borders of Ladue (St. Louis Galleria and Frontenac Plaza). It is obvious that the transient population represented daily in Ladue includes citizens from cities that touch the borders of Ladue and from areas throughout St, Louis City and County. The reported African-American populations in the cities that border Ladue are far greater than Ladue's 0.88 population. For example: Brentwood = 2.88, Richmond Heights = 11.25, Clayton = 8.84, Rockhill = 23.42, Creve Coeur = 6.68, St. Louis County = 21.73, Frontenac = 2.35, State of Missouri = 10.90, Olivette = 24.13, University City = 40.12. Our concern is that the residential data traditionally used in the Vehicle Stop Report does not provide an accurate account of the diverse transient population that truly represents the diversity within the City of Ladue at any given time.

The city of Lake Saint Louis is bordered by I-70 to the north and I-64 bisects the south end with a recent addition of Hwy 364 as a new connector highway throughout St. Charles County. A large shopping center is just north of I-64 and a retail district lies directly to the south. Workers routinely travel both interstate corridors west to the Wentzville GM Plant and to major employers in O'Fallon and other points east. Additionally, the population of our city is greater than indicated from the 2010 census results. As of 2017, the population of the city shows 15,936. Due to these factors, calculating a disparity index based on comparison of ethnicity of drivers stopped with the ethnicity of the city's population may be misleading due to the transient traffic.

I have reviewed the report for the Livingston County Sheriff's Office and wish to include that most of our traffic complaints and enforcement come from traffic violations on U.S. 36 which is a 4-lane divided federal highway. U.S. 36 traffic volume has greatly increased since over the last few year and it is a direct route from Chicago to Kansas City. A low percentage of the traffic stops/contacts we make are actually with Livingston County residents.

The City of Maplewood borders the City of St. Louis and has three heavily traveled thoroughfares within its city limits, which includes Manchester Rd., Hanley Rd. and Big Bend Blvd. The City of Maplewood has over five hundred businesses which includes a number of car dealerships, two major retail shopping centers and a vibrant downtown business district that is home to several restaurants, lounges, two breweries and various specialty shops. Maplewood-Richmond Heights High School is located within the Maplewood city limits. A Missouri Department of Revenue Office and other state offices are located within the Maplewood city limits. Sunnen Business Park & Products Company is located within the Maplewood city limits, as well as two MetroLink stations. The City of Maplewood and the Mid-County Chamber of Commerce hosts several community events throughout the year that draws large crowds of visitors to the City.

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

NOTE: New Bloomfield Police Department was effectively disbanded in early 2018 and law enforcement activities were contracted out to Holts Summit Police Department in June 2018. The data above was reported by Holts Summit Police Department and reflects data for June - December 2018. Since the stops made by New Bloomfield Police Department before its disbanding were not reported, it has been marked as non-compliant.

The City of O'Fallon is located in the center of St. Charles County. We have 2 major Interstates- I-70/64, Route 364 and State Highway 79. O'Fallon also has a major arterial roadway- MO K- that connects the 4 highways from north to south and is a major retail corridor. Because of these heavily traveled roadways, our driver population is more diverse than the census population would indicate, making our disparity index artificially high.

Along with many City and County roadways, the City of Olivette has two major highways within its boundaries. I-170 is on the eastern border and HWY 340 (Olive Boulevard) is a major thoroughfare that runs the entire length of the City. The reported population of the City is 7,737 based on the most current United States Census data. The population figure used in the Attorney General's report is 5,993, which is the number of residents aged 16 and over. What the numerical figures on the report do not consider is that over 153,000 vehicles utilize the Olivette portions of I-170 and Olive Blvd daily. Olivette has several employers that employ hundreds of employees which also increases the daily population. In 2018, the Olivette Police Department made 2,679 traffic stops. The traffic analysis reports submitted to the Missouri Attorney General during this time period indicate the drivers of the stopped vehicles were as follows: 48.6% were White, 44.1% were Black, 4.4% were Asian, and 1.4% were Hispanic. According to the Attorney General's report, the African-American resident population in Olivette is 24.13%. Using that percentage, it appears as if African-Americans were stopped at a rate disproportionate to the African-American resident population. However, the actual number of African-American residents that were stopped was 136, which equates to 5%., far below the resident percentage. In fact, when utilizing those figures, the disparity index is .21. It does not seem adequate to determine potential bias without including the massive amount of people who work, visit and travel through Olivette daily while only considering Olivette's resident population. The Olivette Police Department prides itself on the amount of training our officers receive. Included in that training are courses on bias based policing, implicit bias and racial profiling. The Olivette Police Department is a professional police organization that is committed to protecting all people, both residents and non-residents, from racial or bias based profiling.

The Ozark Police Department has the responsibility of policing 10.6 miles of U.S. Hwy 65, a corridor which runs between Springfield, MO and Branson, MO. According to MoDot, the Average Daily Traffic Count (ADT) for Highway 65 south is 26,193 vehicles and the average daily traffic count for northbound traffic is 25,023; meaning, over 14 million vehicles travel through Ozark on an annual basis. Of the 4,669 total traffic stops conducted by the Ozark Police Department, 2,619 or 56% were non-residents. Furthermore, of the total 201 minority drivers stopped for traffic violations, 134 or 66% were non-residents of Ozark. Of the total 4,468 white drivers that were stopped, 2,485 or 56% were non-residents of Ozark. Although the City of Ozark has a low minority population, individuals from all over the United States travel to and from Branson while using Hwy 65 and naturally this includes individuals of all ethnicities and races.

VEHICLE STOPS DATA 2018

The Platte County Sheriff's Office provides patrol and traffic enforcement services in an area that includes multiple major interstate corridors, a large shopping and entertainment district, casino, many hotels, and the Kansas City International Airport. It is bordered by Kansas City, KS, Kansas City, MO, and Leavenworth, KS, with minority populations of 47.8%, 40.8% and 24.6%, respectively. It should be noted that 69.1% of all traffic stops in 2018 by Platte County personnel were reported as nonresident. Although the racial makeup of all of the nonresident drivers traveling Platte County roadways is unknown, it is unlikely to accurately reflect the racial and ethnic makeup of the county's population. The Platte County Sheriff's Office prohibits racial profiling by policy, and is committed to ensuring impartial public safety service to the public regardless of race, age, gender or other factors. Officers receive annual racial and cultural sensitivity training and the Sheriff's Office maintains accountability through the racial profiling reporting process in compliance with Missouri State Statute.

Platte Woods is a small community located along Interstate 29, to the East and West at NW 72nd St. We have 4 major arteries that lead to or from one of the area's largest shopping districts. Two of those arteries is fed from 2 of the largest entertainment venues in the area, one being a 24 screen movie theater and the other large event bowling, video game and billiard venue. This shopping area and the entertainment venues all reside outside of our city limits. Our city is also the pathway to 4 large apartment complexes, a large high school, a middle school, 2 elementary schools, several fast food and dine in restaurants, as well as many large subdivisions that are not within our jurisdiction. The volume of traffic is extraordinarily disproportionate to our population.

In Pulaski County we have diverse population with a strong support from our military at Fort Leonard Wood. Soldiers and their family come here and at times do not claim residency within Pulaski County. Running through Pulaski County is Interstate 44 which allows others from different regions to travel which brings more diversity to Pulaski County.

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

As a commonly reported issue, both the population and demographics reported from the 2010 census are not an accurate representation of our growing and diversifying community. The Development Services Director for the City of Raymore supplied he official population estimate of 21,167 as of July 1, 2017. The number is provided to the City each May for the previous year by the U.S. Census Bureau. As such, the population estimate for the previous year is not available at the time of our response is due to the Office of the Attorney General. As a clean and safe bedroom community with good schools, Raymore continues to be a desirable location to move to escape the violent crime in Kansas City which borders our city to the north. Gun violence is a topic on the news daily and the FBI ranked Kansas City metropolitan area with significant increases in population each year, placing it far above the number of 14,300, age 16 and over, still used from the 2010 census. According to the “American Community Survey” provided by the Census Bureau every year, Raymore ranked #15 in growth rate (+10.21%) from 2010 to 2017 out of all 129 Missouri cities with a population over 5,000. In 2018, the City of Raymore issued 145 permits for new single family homes, 36 permits for duplex units and 16 permits for townhome units. The number of new single family homes in 2017 was 200, 2016 was 199, 2015 was 123, and 2014 was 97. Economic development has also continued to increase dramatically both in Raymore and several surrounding communities, with the addition of big box stores, restaurants and other retail venues drawing a transient and diverse customer base to the area. In addition to bordering Kansas City, Raymore shares city limits with communities such as Belton, Grandview and Lee’s Summit with considerably larger and more diverse populations. As mentioned in previous reports, a large retail store maintains its position as the highest “call for service” and arrest location in Raymore. This store is one of the only 24-hour operations of this type found in the southern Kansas City metropolitan area. It is located in the same complex of shops as a largest wholesale store that relocated to Raymore from a more urban community, drawing greater diversity of consumers. The total number of traffic stops increased slightly from 4,832 in 2017 to 4,953 in 2018, which may be attributed to a modest improvement in staffing levels although full staffing in Patrol has not yet been achieved.

There are a number of flaws with the disparity index used by the Attorney General's office. Of those flows is the way the AG's office calculates our population for comparison of our vehicle stops. The AG's office count people age 16 (driving age) and over for the analysis. For Richmond Heights the AG's office lists this population in 2018 that is 7,198. The AG's office has used been using the same number since 2011, implying there has been no change. Additionally, the population count makes two fatal assumptions. The first is that it assumes every one of driving age actually drives. They begin driving when they turn 16 years of age and do not stop driving until they are removed from the population count. The second is that the races of that population stay the same 24 hours a day. With two major highways, a shopping mall and additional shopping areas our daytime population increases by tens of thousands of people. The flawed disparity index uses only the individual city demographics, as opposed to more realistic regional demographic. Obviously motorists other than Richmond Heights' residents drive on our streets and highways every day, all say. As a matter of fact of all vehicle stops made by Richmond Heights officers since 1-1-2015 (this statistic does not go back any further), less than 6% were residents of Richmond Heights. An additional flaw is that the disparity index makes the assumption that those motorists of a particular race should be involved in vehicle stops at that exact ratio of their representation in the population. There is no benchmark to support this assumption. To say that a particular race is being stopped too often, one must know the rate of lawbreaking by that group.

The Riverside Police Department by policy and practice prohibits racial profiling. There are factors which dramatically increase the driving population above Riverside's cited driver-eligible population. Those factors include: a daytime population which grows by 87%; the presence of a riverboat casino: bordering on two major metropolitan cities (Kansas City, MO and Kansas City, KS); and state and federal highway routes traveling through the City with a daily traffic count approaching 300,000 vehicles.

I would like it to be noted that there are more stops in Schuyler County done on people outside of our jurisdiction due to the fact there are two US Highways running through our County. We are also a bordering county to Iowa and we see a lot of Iowa traffic. We have a small county population as we are the second smallest county in the state. A couple months ago, I did a traffic count in Queen City MO which is on US Highway 63 in Schuyler County. The result of that count shows almost 46000 vehicles traveled through in a 10 day period. Well beyond our population of 4700.

In 2017 the City of St. Joseph experienced a sharp increase in crime that included one of the highest auto theft rates in Missouri. In 2018 various strategies were developed around prevention, education, community interaction, and enforcement. Strategies involved multiple agencies to include aircraft support in combating local crime that resulted in additional contacts in those areas experiencing the greatest impact from criminal activity. By the end of 2018 we had an 8.8% drop in Part I crime to include a 26.5 % drop in auto theft.

The City of St. Louis is approximately 62 square miles in size and lies at the core of the largest metropolitan area in the state. The City is comprised of 79 diverse neighborhoods and 108 City parks and is home to a world-renowned zoo and botanical garden as well as other major museums and arts and entertainment attractions. The City hosts every home game for two major sports franchises and one Division I university, a multitude of concerts and theatrical performances at numerous venues, and a set of large regional cultural events including a large multi-day Independence Day festival, and the second-largest Mardi Gras celebration in the country. As the urban core of the metropolitan area, the City's estimated daily population grows by approximately 35%, drawing from all surrounding cities and counties within the metropolitan statistical area. In addition, regional daily commuting patterns bring residents from throughout the region, as well as citizens from outside the region, into the City limits. While the data compiled in this report are informative, it is important to note that disparity indices represent ratios based simply on resident population and do not take into consideration regional population, commuting patterns, or factors intrinsically associated with providing law enforcement services within citywide or within localized pieces of City geography. As a result, a disparity rate alone does not serve as proof, or even an indication, of racial profiling. Department policy prohibits bias-based policing and officers must adhere to this policy. Every commissioned member of the Department receives annual training on procedural justice that addresses bias-based policing, as required both by State law and by Department policy. This training is supplemented and reinforced by periodic courses in related topics such as cultural diversity, ethics, and communication skills. The Department continues to work with its officers, local leaders, and community and academic partners to identify best practices as they relate to citizen contacts.

The data presented in this report provides a summary of stop data and a rudimentary overview of traffic stop disparity in St. Louis County, but should not be used to draw meaningful conclusions about racial profiling. The disparity index calculated uses census data as a benchmark. Census data does not account for the diverse population traveling throughout the county's 523 square miles on its 3,100 lane-miles of roadway. St. Louis County is not only the state's largest population center with approximately one-sixth of the state's population, it is also a major travel, employment, and educational center. Six major interstate highways converge within the county and according to a 2013 Missouri Department of Transportation study, St. Louis County has the highest average annual daily traffic counts in the region, with some portions of the interstate accommodating as many as 200,000 vehicles per day. St. Louis County is home to more than 20 institutions of higher education, eight major malls, and countless shopping plazas employing one-fourth of the state's workforce. As a major employer, commercial and educational center, St. Louis County not only attracts residents from the surrounding counties, but outlying counties in this state and the state of Illinois. For all these reasons, using census data as a benchmark cannot provide an accurate measure of the driving population in St. Louis County. Conclusions about disparity or racial profiling drawn from a census benchmark method are problematic. More in-depth research with advanced techniques should be used to discover meaningful results.

VEHICLE STOPS DATA 2018

Agency: St. Mary Police Dept.

Population: 277
age 16 and over

Thank you for the opportunity to provide an explanation regarding the 2018 summary of racial profiling data for Town and Country Police Department. It is unfortunate that our disparity index is based upon population demographics of Town and Country, which has a population of approximately 11,000 people with an African American population of 2.69 percent. The calculation drawn from the data are at best misleading and at worse, potentially inflammatory. Approximately 400,000 motorists travel through our city limits each weekday with one of the most voluminous interchanges in the state (IS 64 and IS 270). Our motoring public is reflective of the demographics of the State and St. Louis County, which are comprised of African American populations of approximately 11 and 19 percent respectively. The traffic stop data for Town and Country officers indicates that approximately 4 percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and country demographics, not that of Town and Country. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our city limits. A thought full examination of the data indicates that our practice matches our policy.

Accuracy Verification

The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate.

To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Woodson Terrace has six major hotel chains along with three major car rental agencies within its city limits. These businesses employ minorities as a large percentage of their workforce. The campus of Columbia College is located in Woodson Terrace which also has a large minority population attending studies. Interstate Highway I-70 which supports the entrance and exits of Lambert International Airport travels east and west within the city limits of Woodson Terrace. The airport not only has a large minority work force but the Lambert International Airport served over 15 million passengers who at some point thru Woodson Terrace. The City of Berkeley, whose population as of the 2010 census, consisted of over 81% African American, adjoins Woodson Terrace on the entire length of its eastern border. Woodson Terrace is also supported by State Highway 115, traveling east and west as well as State Highway EE which travels south and north, both within the city limits of Woodson Terrace.

Section 590.650, Revised Statutes of Missouri State Law on Vehicle Stops Reporting

Missouri Revised Statutes

Chapter 590
Peace Officers, Selection, Training, and Discipline
Section 590.650

Effective August 28, 2004

Racial profiling — minority group defined — reporting requirements — annual report — review of findings — failure to comply — funds for audio-visual equipment — sobriety check points exempt.

590.650. 1. As used in this section “minority group” means individuals of African, Hispanic, Native American or Asian descent.

2. Each time a peace officer stops a driver of a motor vehicle, that officer shall report the following information to the law enforcement agency that employs the officer:

(1) The age, gender and race or minority group of the individual stopped;

(2) The reasons for the stop;

(3) Whether a search was conducted as a result of the stop;

(4) If a search was conducted, whether the individual consented to the search, the probable cause for the search, whether the person was searched, whether the person's property was searched, and the duration of the search;

(5) Whether any contraband was discovered in the course of the search and the type of any contraband discovered;

(6) Whether any warning or citation was issued as a result of the stop;

(7) If a warning or citation was issued, the violation charged or warning provided;

(8) Whether an arrest was made as a result of either the stop or the search;

(9) If an arrest was made, the crime charged; and

(10) The location of the stop.

Such information may be reported using a format determined by the department of public safety which uses existing citation and report forms.

3. (1) Each law enforcement agency shall compile the data described in subsection 2 of this section for the calendar year into a report to the attorney general.

(2) Each law enforcement agency shall submit the report to the attorney general no later than March first of the following calendar year.

(3) The attorney general shall determine the format that all law enforcement agencies shall use to submit the report.

4. (1) The attorney general shall analyze the annual reports of law enforcement agencies required by this section and submit a report of the findings to the governor, the general assembly and each law enforcement agency no later than June first of each year.

(2) The report of the attorney general shall include at least the following information for each agency:

(a) The total number of vehicles stopped by peace officers during the previous calendar year;

(b) The number and percentage of stopped motor vehicles that were driven by members of each particular minority group;

(c) A comparison of the percentage of stopped motor vehicles driven by each minority group and the percentage of the state's population that each minority group comprises; and

(d) A compilation of the information reported by law enforcement agencies pursuant to subsection 2 of this section.

5. Each law enforcement agency shall adopt a policy on race-based traffic stops that:

(1) Prohibits the practice of routinely stopping members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law;

(2) Provides for periodic reviews by the law enforcement agency of the annual report of the attorney general required by subsection 4 of this section that:

(a) Determine whether any peace officers of the law enforcement agency have a pattern of stopping members of minority groups for violations of vehicle laws in a number disproportionate to the population of minority groups residing or traveling within the jurisdiction of the law enforcement agency; and

(b) If the review reveals a pattern, require an investigation to determine whether any peace officers of the law enforcement agency routinely stop members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law; and

(3) Provides for appropriate counseling and training of any peace officer found to have engaged in race-based traffic stops within ninety days of the review.

The course or courses of instruction and the guidelines shall stress understanding and respect for racial and cultural differences, and development of effective, noncombative methods of carrying out law enforcement duties in a racially and culturally diverse environment.

6. If a law enforcement agency fails to comply with the provisions of this section, the governor may withhold any state funds appropriated to the noncompliant law enforcement agency.

7. Each law enforcement agency in this state may utilize federal funds from community-oriented policing services grants or any other federal sources to equip each vehicle used for traffic stops with a video camera and voice-activated microphone.

8. A peace officer who stops a driver of a motor vehicle pursuant to a lawfully conducted sobriety check point or road block shall be exempt from the reporting requirements of subsection 2 of this section.

(L. 2000 S.B. 1053, A.L. 2001 H.B. 80, A.L. 2004 S.B. 1233, et al.)

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.

Appendix C

Resident and Non-Resident Stops

Appendix C - Resident and Non-Resident Stops

Agency: Adair County Sheriff's Dept.

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	21226	19730	342	408	420	53	273
Total Stops	675	622	34	14	0	2	3
Disparity Index	N/A	0.99	3.13	1.08	0.15	0.00	0.35
Resident Only Disparity Index	N/A	0.99	4.21	0.37	0.18	0.00	0.00
Resident Stops							
Number Residents Stops	280	258	19	2	1	0	0
Resident % of Stops	41.48	41.48	55.88	14.29	50.00	0.00	0.00
Non-Resident Stops							
Number Non-Resident Stops	395	364	15	12	1	0	3
Non-Resident % of Stops	58.52	58.52	44.12	85.71	50.00	0.00	100.00

Notes: Population figures are from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.
Disparity Index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.
Resident Only Disparity Index = (proportion of stops only involving residents / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.
Black cell indicates zero denominator.

Agency: Adrian Police Dept.

Non-Resident % of Stops	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Notes: Population figures are from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.
Disparity Index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.
Resident Only Disparity Index = (proportion of stops only involving residents / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.
Black cell indicates zero denominator.

Agency: Winona Police Dept.
